Adrian Nieć

Junior DevOps

Since I remember I was fascinated by new technologies rapidly adapting and getting into our daily routines to make life easier. I always wanted to be a part of that change, to help someone with my knowledge and expertise in creating something outstanding. That led me to a BSc degree in the Computer Science field of study at one of the most renowned universities in Poland - AGH University of Science and Technology. I am actively seeking new challenges and opportunities. If you believe that my skills and experience align with the requirements of your project, please feel free to contact me.

Experience

Jul 2023 - Now
Hostersi, Poland
Junior Administrator

Work at Hostersi significantly enriched my skill set. At first line of support, I had the opportunity to address a diverse range of intricate issues. This experience provided me with a comprehensive understanding of modern technologies, e.g.: Elastic Stack, Kubernetes, and Docker. I've honed my expertise in infrastructure as code using Terraform, and worked extensively with diverse cloud services, particularly AWS and Azure.

Aug 2022 - Mar 2023
Kyndryl, Poland
IT Assistant

During my time at Kyndryl, I had the privilege of working alongside exceptional individuals who were experts in their respective fields. Through their mentorship and guidance, I was able to enhance my proficiency in Linux administration, broaden my knowledge of cloud solutions, and obtain industry certifications.

Mar 2021 - May 2021
Rockwell Automation, Poland
Intern in software development department

I was part of an Agile team where my primary duty was to port the test framework from version 2 to 3 of the Python programming language. This role allowed me to leverage my networking knowledge and gain a deeper understanding of the automation sector. In addition to Python, I had opportunity to work with tools such as GitLab, qTest, Jenkins, Jira, and CodeCollaborator.

Aug - Oct: 2015 - 2018
Fellespakkeriet, Norway
Team leader & machine driver

I worked as a seasonal employee from August to October (2015-2018) at a fresh produce packhouse in Norway, which was my first professional experience. Through hard work and dedication, I progressed through all entry positions and ultimately became a leader for a multinational team of fifteen. My responsibilities included configuring and operating industry machines such as the Greefa EasySort, flow-packs, forklifts, and a Boix tray former.
