Adrian Nieć
PYTHON DEVELOPER

PROFILE

I would see myself as a part of crew developing web solutions. It seems extremely interesting for me and gives me high dose of motivation to do my work as good as I can with that positive chase of perfection. Doing even little change leading me towards destination makes me happy, because taking small steps each day help to be better person, specialist and support for community.

CAREER

● Intern in software development department

ROCKWELL AUTOMATION INC.: KATOWICE, POLAND   Mar.-May 2021

I was responsible for porting test framework from Python 2 to version 3. In this role I could make use of my networking knowledge and get deeper understanding of automation sector. During this time I get used to work in scrum methodology and to always have on mind strict company policy. Apart from obvious use of Python I have had experience with tools such as GitLab, qTest, Jenkins, Jira, CodeCollaborator.

● Team leader & machine driver

FELLESPAKKERIET SA: LIER, NORWAY   Aug.-Oct. 2017 & 2018

I led food processing line (Greefa Easy Sort / Kombi) and team (approx. 15 people). I was responsible for proper configuration of company IT systems. During this time I have definitely learned multitasking. I had to take care about each aspect of production to improve standards and make someone's else work easier.

● Control, sorting and packing employee

FELLESPAKKERIET SA: LIER, NORWAY   Aug.-Oct. 2015 & 2016

I have started my journey with Fellespakkeriet on fruit processing line where I was sorting then packing plums and apples. My motivation, hard work and curiosity how company works led me to next positions. During this time I was: forklift (Toyota Traigo 48), flow-pack (GNA Srl Marlin 80) and tray former (Boix Q-1500) operator.

EDUCATION

● Bachelor of Computer Science

AGH UNIVERSITY OF SCIENCE AND TECHNOLOGY   Present (defence of thesis)
